PERSONAL STATEMENT

Enthusiastic and adaptable web developer with foundational knowledge in JavaScript, React.js, and PHP for backend development. Experienced in managing WordPress websites and digital content while currently strengthening my expertise in React.js and learning Java and Python. Passionate about building functional web solutions, improving user engagement, and continuously expanding my technical skills in a collaborative environment, with a strong desire to contribute to innovative projects in the Web3 space.

TECHNICAL SKILLS

- **Languages & Frameworks:** JavaScript, React, Node.js, HTML, CSS, Python, Java, PHP, Bootstrap.
- **Tools & Platforms:** Git/GitHub, WordPress, API Integration
- **Database Management:** SQL,
- **Other Skills:** Version Control, Web Performance Optimization, UI/UX Principles

PROJECTS

1. Weather App
- **Tech Stack:** React, JavaScript, HTML, CSS, OpenWeather API
- **Description:** Developed a weather application that fetches real-time weather data based on user input. Integrated API to display temperature, humidity, and wind speed.
- **GitHub Repo** | **Live Demo**

2. Functional Calculator with Date & Time
- **Tech Stack:** HTML, CSS, JavaScript
- **Description:** Developed a fully functional calculator that also displays the current date and time dynamically.
- **GitHub Repo** | **Live Demo**

3. Replicated UI Designs
- **Tech Stack:** HTML, CSS
- **Description:** Recreated landing pages, sign-up, and login pages from platforms like Bemore, Whogohost, Twitter, Yahoo Mail, and Remita to improve frontend design skills.

4. BEMORE
- **Tech Stack:** HTML, CSS
- **Description:** Created a landing page for Bemore Girls Foundation using HTML and CSS, focusing on positioning, background images, and styling.

- [**GitHub Repo**](#) | [**Live Demo**](#)

5. Animated Single-Page Website
- **Tech Stack:** HTML, CSS
- **Description:** I replicated a single-page website incorporating **animations, media queries, Font Awesome icons, and Google Fonts**. Explored **advanced positioning techniques** to enhance layout design.
- [**GitHub Repo**](#) | [**Live Demo**](#)

6. Dorry- Digital Agency Website
- **Tech Stack:** HTML, CSS
- **Description:** I replicated a responsive single-page website for a digital agency, featuring a structured navigation bar, engaging UI design, and optimized layout using media queries. Integrated Font Awesome icons and Google Fonts for enhanced aesthetics
- [**GitHub Repo**](#) | [**Live Demo**](#)

7. Vector- Popular Pro Stock
- **Tech Stack:** HTML, CSS
- **Description:** I replicated a responsive landing page for a stock vector platform, featuring intuitive navigation, dropdown menus, and interactive elements. Utilized Font Awesome icons, Google Fonts, and CSS animations to enhance visual appeal and functionality. Focused on optimizing layout for seamless user experience across devices.
- [**GitHub Repo**](#) | [**Live Demo**](#)

8. Empowa – Non-Profit Website
- **Tech Stack:** HTML, CSS, JavaScript, Bootstrap
- **Description:** I replicated a responsive website for Empowa, a non-profit focused on education and leadership in Nigeria. Features include intuitive navigation, a dynamic carousel, and interactive elements. Built with Bootstrap for responsiveness, JavaScript for interactivity, and CSS animations for visual appeal. Optimized for accessibility and seamless performance.
